(2) Remove the section for recording the name and ID number of the CAPI supervisor if the survey does not have CAPI supervisors who are separate from the team supervisors.

Note: Questions with highlighting in the question number column may be deleted in some circumstances (see footnotes). Brackets [] indicate items that should be adapted on a country-specific basis.

INTRODUCTION AND CONSENT

(1)

Hello. My name is _____. I am working with [NAME OF ORGANIZATION]. We are conducting a survey about health and other topics all over [NAME OF COUNTRY]. The information we collect will help the government to plan health services. Your household was selected for the survey. The questions usually take about 30 to 60 minutes. All of the answers you give will be confidential and will not be shared with anyone other than members of our survey team. You don't have to be in the survey, but we hope you will agree to answer the questions since your views are important. If I ask you any question you don't want to answer, just let me know and I will go on to the next question or you can stop the interview at any time.

In case you need more information about the survey, you may contact the person listed on the card that has already been given to your household.

Do you have any questions?
May I begin the interview now?

SECTION 3. FOOTNOTES

- (1) Studies have indicated emergency contraception can be effective up to 5 days. Verify country program recommendations and modify wording if appropriate.
- (2) The Standard Days Method (SDM) should be deleted in countries that do not have an SDM program. In these countries, SDM should also be deleted as a coding category in Qs. 307, 321, 327, 329, 726, and Column 1 of the calendar.
- (3) The LAM method should be deleted in countries that do not have a LAM program. In these countries, LAM should also be deleted as a coding category in Qs. 307, 321, 327, 329, 726, and Column 1 of the calendar.
- (4) Can be deleted in countries with very low sterilization coverage.
- (5) Other commonly used methods may be added to the list, such as contraceptive patch, contraceptive vaginal ring, or sponge. Any codes added in Q. 307 must also be added to Qs. 321, 327, 329, 726, and Column 1 of the calendar. These methods should not be added to Q. 301.
- (6) Adapt if needed to the local name for Sayana Press. Questions on Sayana Press should be deleted if the country does not have a Sayana Press program.
- (7) Coding categories to be developed locally; however, the broad categories must be maintained.
- (8) If the survey will be conducted using paper questionnaires, delete 316-317I under CAPI OPTION. If the survey will be conducted using CAPI, delete 316-317 under PAPER OPTION.
- (9) Year of fieldwork is assumed to be 2020. For fieldwork beginning in 2021, all references to calendar years should be increased by one; for example, 2014 should be changed to 2015, 2015 should be changed to 2016, 2016 should be changed to 2017, and similarly for all years throughout the questionnaire.
- (10) In countries without national fieldworker programs that include family planning, Qs. 332 and 333 should be deleted.

- (1) Coding categories to be developed locally; however, the broad categories must be maintained.
- (2) Vaccination practices may vary; this question should specify where the injection is given, e.g. arm or shoulder.
- (3) This question must capture all types of iron-containing supplements, including, for example, multiple micronutrient supplements in countries where these types of iron-containing supplements are available. Adapt the question wording to reflect all types of iron-containing supplements available in the country.
- (4) In countries where it is important to know the number of iron tablets taken per day, an appropriate question may be added.
- (5) The question should be deleted in surveys in countries where there is no program for deworming.
- (6) The question should be deleted in surveys in countries where there is no program. Adapt the question to include the local name(s) of formal food or cash programs. It may be necessary to revise or add additional questions depending on country needs. See the DHS Questionnaire Adaptation Guide for information on how to adapt.
- (7) The question should be deleted in surveys in countries where there is no program for intermittent preventive treatment against malaria during pregnancy.
- (8) Fansidar is a brand name for the malaria medicine SP. There are also many other brand names for SP. If Fansidar is not a commonly known brand in the country, change "Fansidar" to the most commonly known brand name for SP, like this "SP/[NEW BRAND NAME]". Or you can simply delete "/Fansidar" and leave "SP" on its own.

SECTION 5. FOOTNOTES

- (1) Replace the word 'card' with the term used locally to refer to the official vaccination record for the child, such as 'mother and child booklet'.
- (2) The questionnaire should look like the vaccination card in the country. Obtain current or recent vaccination cards from the national immunization program. Add yellow fever, rubella, or any other vaccine recommended in the country for children under age 3. Delete any of these vaccinations that are not included in the country's vaccination schedule. Consult with the EPI program in the country to verify the questionnaire reflects the correct vaccination card.
- (3) Delete in countries where polio 0 (polio at birth) is not part of the vaccination schedule.
- (4) Delete in countries where IPV is not part of the vaccination schedule.
- (5) Adapt question locally to follow national vaccination schedule. If DPT, Hep. B and Hib are given separately, provide separate entries for the recommended number of doses of each.
- (6) If vaccination schedule only uses two doses of vaccine, remove 3rd entry.
- (7) Adapt question locally to use the name of the measles containing vaccination (MCV) used in the country: measles, MMR, or MR.
- (8) If vaccination schedule only uses one dose of vaccine, remove 2nd entry.
- (9) Filter should reflect the vaccination list on the card (excluding vitamin A, which is not a vaccination).
- (10) Change the wording of this question to match the names used for supplemental immunization activities in the country.
- (11) Adapt question locally after determining the most common injection site. For example, pentavalent may be given in the left outer thigh, and pneumococcal in the right outer thigh.
- (12) Delete this question in countries where the vaccination schedule includes only one dose of measles containing vaccination.
- (13) Coding categories to be developed locally; however, the broad categories must be maintained. Insert name(s) of recent vaccination campaigns, or remove response option 41 if the country does not conduct vaccination campaigns.

SECTION 6. FOOTNOTES

- (1) Only include item (a) if a country has a national pill/syrup program, and only include item (b) if country has a national micronutrient powders (MNP) program. If a country includes both types of supplements in their national program, retain both items. Remove this question in countries that do not have a national iron supplementation program for children.
- (2) As per WHO guidance, annual administration of deworming medication is recommended where the baseline prevalence of soil-transmitted helminth infection is 20-50% and semiannual administration is recommended when the prevalence is >50%. Where prevalence is below 50%, countries may choose to change the reference period in Q606 from 6 to 12 months. The question should be deleted in surveys in countries where there is no program for deworming.
- (3) Item 'c' refers to measurement of the mid upper arm circumference (MUAC). Rephrase this item as needed so that mothers will understand which part of the body the question is referring to. If a country does not have wide-scale Community Management of Acute Malnutrition (CMAM) program, item 'c' can be removed.
- (4) The term(s) used for diarrhea should encompass the expressions used for all forms of diarrhea, including bloody stools (consistent with dysentery), watery stools, etc.
- (5) Coding categories to be developed locally; however, the broad categories must be maintained.
- (6) Include in the question the common names/brands for pre-packaged ORS liquids. If pre-packaged ORS liquids are not available in the country, this item should be deleted.
- (7) If the government does not recommend a homemade fluid, then this item should be dropped from the question. If the government does recommend a homemade fluid, this item should be adapted to include the terms used locally for the recommended home fluid. The ingredients promoted by the government for making the recommended home fluid should be reflected in the category.
- (8) The question should be deleted in countries that are not affected by malaria.
- (9) Coding categories to be developed locally and revised based on the pretest. All antimalarials commonly used in the country should be included in the response categories. Common brand names of medicine, such as Bayer or Tylenol, should be added to the response categories for aspirin, acetaminophen, or ibuprofen as appropriate.
- (10) All drink and food group categories must be adapted to include commonly consumed drinks and foods in the survey country. Please see the DHS Questionnaire Adaptation Guide (*forthcoming*) for information on how to adapt the drink and food groups.
- (11) This drink or food category is optional. Remove it from the questionnaire when the category is not relevant to the country. When removing optional categories, do not renumber the remaining food categories.
- (12) Remove from the questionnaire if adaptation only includes one question for the sweet foods group.

- (1) Delete question 1001 in countries where knowledge of HIV and AIDS is nearly universal. If 1001 is deleted, revise 1040 to remove the reference to 1001 and version b). Only the text from version a) will remain.
- (2) PrEP refers to pre-exposure prophylaxis. Use the local term for PrEP, if applicable.
- (3) Delete these questions if the country does not have a national PrEP program.
- (4) Question may be considered for deletion in low HIV prevalence countries.
- (5) Coding categories to be developed locally; however, the broad categories must be maintained.
- (6) These questions are used to report on a UNAIDS Global AIDS Monitoring (GAM) indicator. They should be used in countries with or without HIV testing. However, if the estimated HIV prevalence in a country is below 1%, it is advisable to remove these questions, as the number of self-reported HIV positive respondents will be extremely low, even at the national level. For countries with estimated HIV prevalence below 2%, anticipated sample size should be considered in deciding whether to retain or remove the questions.

(1) Year of fieldwork is assumed to be 2020. For fieldwork beginning in 2021, all references to calendar years should be increased by one; for example, 2015 should be changed to 2016, 2016 should be changed to 2017, and similarly for all years throughout the questionnaire.

(2) Response categories may be added for other methods, including fertility awareness methods.
