

ERRATA

International Institute for Population Sciences (IIPS) and Macro International. 2007. *National Family Health Survey (NFHS-3), 2005-06: India: Volume I*. Mumbai: IIPS.

NOTE: This error in the printed report has already been corrected in the electronic version of the report.

Page 4 — The following text replaces the last paragraph:

The total fertility rate for Muslims (3.4) is higher than the rate for Hindus (2.6). Although fertility decreased for both groups in the seven years between NFHS-2 and NFHS-3, the fertility differential did not change over this period.
